*“Women of Wisdom is in the forefront of the biggest change in human history – the only change that will assure our continuity as a species. ... WOW demonstrates a tremendous change in who we are and how we do things. Playing their part to usher in feminine mind, WOW emphasizes process rather than just product, and making things cohere, relate, and grow.”*

Jean Houston, Ph.D., author of *The Possible Human*,  
excerpt from *Women of Wisdom*

*“Stopping violence against women and children is a core foundation  
for a peaceful and sustainable society.”*

Riane Eisler, author of *The Real Wealth of Nations: Creating a Caring Economic* s excerpt from *Women of Wisdom*

In this new book, written and compiled by Kris Steinnes, founder of Women of Wisdom Foundation and the Women of Wisdom Conference, answers bloom like wildflowers through a mixture of spiritual, academic, and artistic contributions from professionals and lay people who share their experience of being women and being divine. In these selections, poetry mixes with history, visual art with the inner spirit, and the intellect with soulful longing, creating an inspiring kaleidoscope of feminine reverence. Often practical, always moving, the guidance on these pages speaks to the divine within us all.

*“This anthology of wisdom from some of the greatest women thinkers and writers of our time is a rare treasure. It inspires, informs, and gives us hope for the future in which the best potential of all people, and of our precious earth, can be realized.”*

Joan Borysenko, Ph.D., author of *A Woman’s Book of Life*.

This beautifully designed book leads the reader on a journey of awakening to their calling. While reading the contributions from diverse best selling authors they will experience the beautiful power of women’s spirit, and hear the call to find their voices and become leaders in their personal lives and in society.
